Google Applications
What password do I use when accessing Google Applications?

If you are logging into a Google Password page, if you are a student it username@my.fit.edu and if you are a staff or faculty its username@go.fit.edu

Sign in with your Google Account

Leave the password blank and you will be redirected to a TRACKs login page.

For some applications you will need a Google Apps Password, like email on a phone:

Students, Faculty and Staff may set this password using our password change tool (select Google Password from the drop down). To help you remember (this password is not required to change like your TRACKS) improve security we ask that you choose a different password from that of your TRACKS password.
