Lab Software
What is ANSYS?

ANSYS is a Computer Aided Design (CAD for short) software for modeling
and testing engineering designs in a virtual instance. This software allows across a
user's design through user defined specific presets (Stress, Time, Temperature,
ect..) for the user to view stresses, strains, heat flow and many other options.

Licensing

Florida Institute of Technology offers a network concurrent licensing for computer
systems tagged with FIT Property stickers. Faculty and Staff who require the
software for academic teaching purposes can request the software installation by
contacting the Technology Support Center. Students are not permitted to have
ANSYS installations, they may use one of the many computer labs controlled by Lab
Support Services.

Available Toolboxes and Seats

To request additional toolboxes or an increase to the number of seats per toolbox,
please contact the Technology Support Center. Seats are the amount of users that
can checkout a specific license component at a given time. As each toolbox is
checked out, a seat is consumed until the user exits out of the toolbox or software
to free their seat.

Maintaining of Software

The Lab Support Services, Information Technology department is primary
responsible for all licenses and software maintainance. They can be contacted
through the Technology Support Center.

Location of Software

The software can be found in all Lab Support Services, Information Technology
supported multimedia classrooms, open-computer labs, and instructor workstations.
For a complete list of these specific locations, please visit the Lab Support Services
main webpage at: http://it.fit.edu/computing/labs.php under "I.T. Computer Labs &
Classrooms".
Support requests can be forwarded to the Technology Support Center for processing by visiting their homepage at [http://www.it.fit.edu](http://www.it.fit.edu).
