Lab Software
What is Polymath?
Polymath is a mathematical computation software that allows the user to solve problems using numerical analyses. It can provide the solutions to the problems graphically for ease of use and understanding. This program can also be used in partner with Microsoft Excel to solve problems.

Licensing
Florida Institute of Technology offers a network concurrent licensing for computer systems tagged with FIT Property stickers. Faculty and Staff who require the software for academic teaching purposes can request the software installation by contacting the Technology Support Center. Students are not permitted to have Polymath installations, they may use one of the many computer labs controlled by Lab Support Services.

Available Toolboxes and Seats
To request additional toolboxes or an increase to the number of seats per toolbox, please contact the Technology Support Center. Seats are the amount of users that can checkout a specific license component at a given time. As each toolbox is checked out, a seat is consumed until the user exits out of the toolbox or software to free their seat.
